

Introduction

The CDM COL Silverlight Player is a web-based and/or desktop application based on Microsoft's Silverlight technology. Silverlight provides the ability to access COL lectures on many different platforms, including Windows and Mac OS. In addition, Silverlight technology allows the same player application to be run in a variety of web browsers – including Microsoft Internet Explorer, Mozilla Firefox, and Google Chrome – as well as on a user's desktop in a standalone version without any browser involvement.

The Silverlight player is intended to eventually supersede all other COL players, including the COL Player for Windows and the COL Flash player. However, the initial release is a beta; the Silverlight player is not yet fully developed and all features are not yet implemented. Therefore, the other players will remain available, although CDM will be stopping development on them in order to focus on the Silverlight player.

System Requirements

Microsoft Silverlight is required to use the Silverlight COL player. If you do not have Silverlight installed on your system when attempting to access the COL Silverlight player, you will automatically be prompted to download and install it.

The following system specifications are suggested for running the COL Silverlight player:

- Pentium 4 CPU or better
- For Macs – an Intel CPU is required; PowerPC architectures are unsupported
- At least 1 GB RAM
- Sound card and speakers
- Broadband Internet connection
- At least 800x600 screen resolution

Compatibility

The COL Silverlight player has been tested on the following OS and browser configurations. The number in parentheses indicates the latest tested version number of each browser.

	Internet Explorer	Mozilla Firefox	Google Chrome	Opera	Safari
Windows 7	OK (IE8)	OK (3.6.13)	OK (8.0.552.224)	OK (10.63)	OK (5.0.3)
Windows Vista	OK (IE8)	OK (3.6.13)	OK (8.0.552.224)	OK (10.63)	OK (5.0.3)
Windows XP	OK (IE8)	OK (3.6.13)	OK (8.0.552.224)	OK (10.63)	OK (5.0.3)
Windows 2000 SP4	OK (IE6 SP1)	OK (3.6.13)	Not supported	OK (10.63)	Not supported
Mac OS X 10.6	Not supported	OK (3.6.13)	OK (8.0.552.224)	OK (10.63)	OK (5.0.3)
Mac OS X 10.5	Not support	OK	OK	OK	OK
Mac OS X 10.5 (PowerPC)	Not supported	Not supported	Not supported	Not supported	Not supported
Mac OS X 10.4.8 (PowerPC)	Not supported	Not support	Not supported	Not supported	Not supported

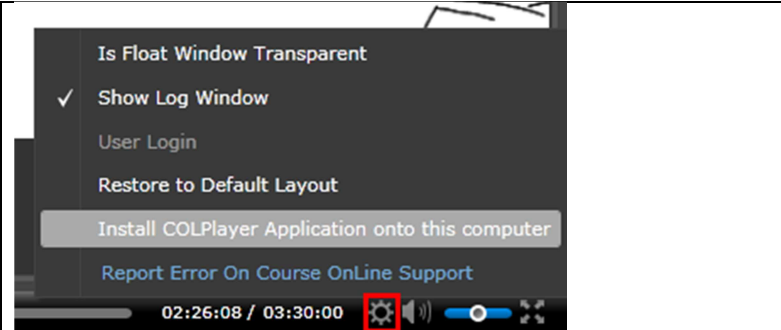

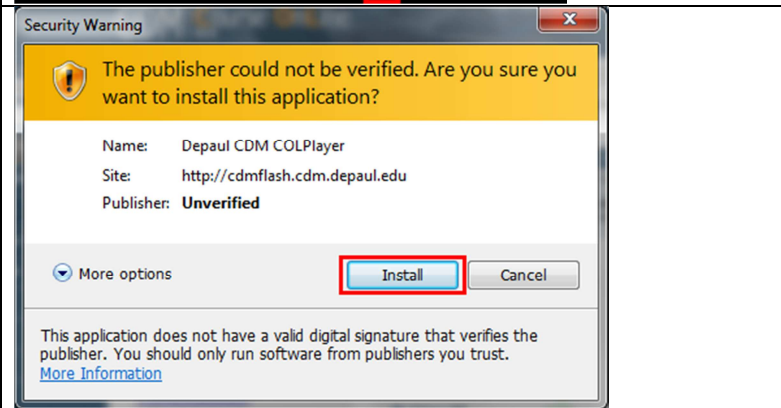

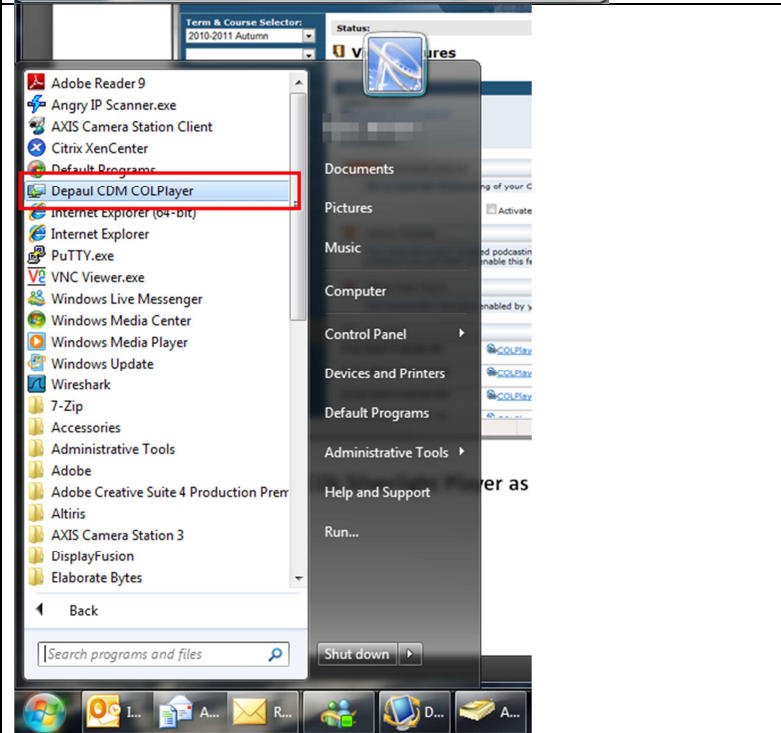

Accessing the COL Silverlight Player from the Web

The COL Silverlight player can be accessed through the COLWeb site at <https://col.cdm.depaul.edu>. The player can be launched by choosing the “Silverlight” link next to any posted lecture recording.

<div> DEPAUL UNIVERSITY</div> <div>You have requested access to a site that requires Campus Connect authentication: https://col.cdm.depaul.edu/login/SSO.aspx</div> <div><div>CAMPUS CONNECT AUTHENTICATION Please enter your Campus Connect User ID and Password User ID: <input type="text"/> Password: <input type="password"/> Forgot your password? <input type="button" value="Login"/> <input type="button" value="Clear"/></div><div>© 2001-2010 DePaul University Disclaimer Contact Us Site Map 1 E. Accessing the COL Silverlight Player as a Desktop Application (Windows)

The player may be installed as a desktop application (independent of the web browser) by choosing “Install COLPlayer Application onto this computer” from the options menu in the browser-based COL Silverlight player. Once installed, it can be accessed from your Start menu.

	<p><u>Step 1</u></p> <p>Launch any recorded lecture from the COLWeb site and choose the Silverlight player. When the player loads, click the Options icon (gear) and choose “Install COLPlayer Application onto this computer.”</p>
	<p><u>Step 2</u></p> <p>Accept the security warning and complete the installation by clicking the “Install” button on the resulting dialog box.</p>
	<p><u>Step 3</u></p> <p>A shortcut to the COL Player will be created in your Start menu, under All Programs. When you launch it, you will be prompted for your Campus Connect username and password to log in.</p>

COL Silverlight Player Interface

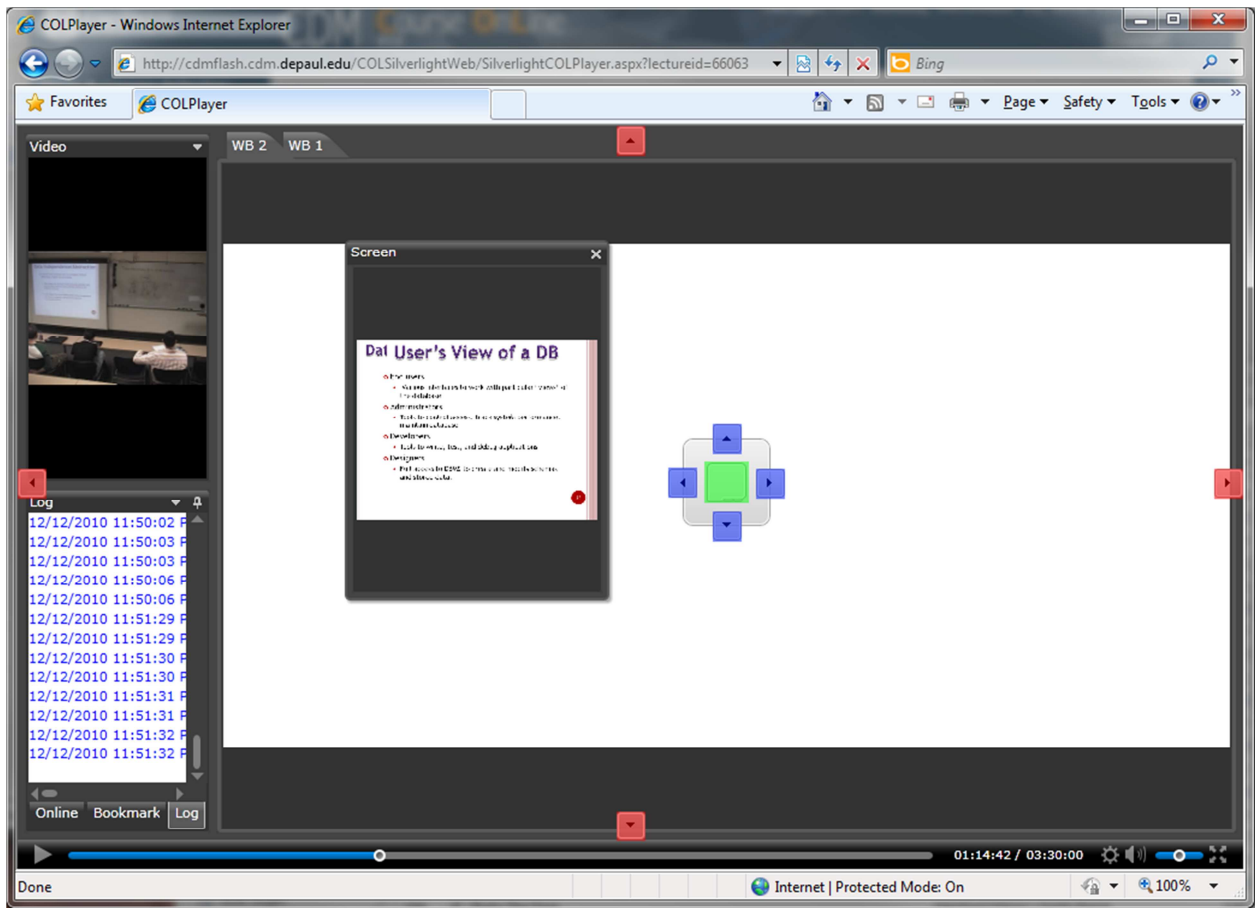

The COL Silverlight player's interface has several important features.

- Each component can be moved and resized to any position within the player interface.
- Most components can be “docked” as tabs that can be easily switched between.
- The various components can snap to different areas of the window once the user has started dragging them.
- Playback controls are all contained in a bar at the bottom of the window.
- The player can be operated in windowed or full-screen mode.
- The standalone player can display a list of all of the lectures that the user has access to; in this way, lectures can be accessed without needing to go to the COLWeb site.
- The user can report errors directly from within the player.

Moving and Resizing COL Silverlight Player Components

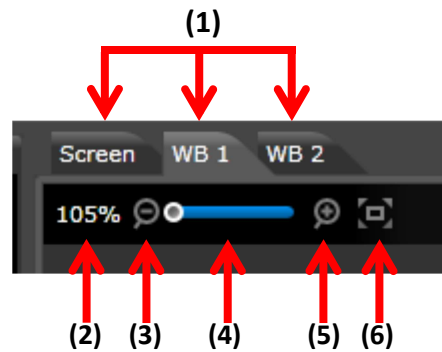

Any of the components inside the COL Silverlight player window can be moved around and resized. They can also be automatically docked to any of the four sides of the window or screen. In addition, most of the components can be added to a tabbed interface within the window or screen. In addition, any of the components can be made into floating windows by clicking and dragging their title bar or tab.

<p>The arrows in RED will dock the selected component on a side of the window.</p>	<p>The arrows in BLUE will create a new tabbed window occupying about half of the window.</p>	<p>The GREEN button will dock the component as a new tab in an existing tabbed window.</p>

Tabbed Interface and Pan/Zoom Controls

Each component in the COL Silverlight player can be displayed in a tabbed interface. The Silverlight player can support multiple tabbed interfaces at a time. In addition, the whiteboard and instructor PC screen capture components have pan and zoom controls.

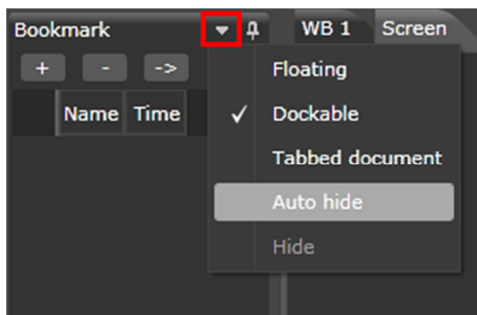

1	Tab controls for switching components
2	Current zoom percentage
3	Zoom out button

4	Zoom slider
5	Zoom in button
6	Actual size button (return to 100%)

If you have zoomed in on a whiteboard or screen capture past the maximum size of the window, you may click and drag in order to pan around the image. Clicking the “Actual Size” button will return your view to 100%.

Auto Hide

Some lesser-used components – the list of available courses (“Online” window), the bookmarks list, and the diagnostic log – can be automatically hidden on the side of the window to conserve screen space. To enable this functionality, select the desired component, click the down arrow to open the menu, and choose “Auto hide.”

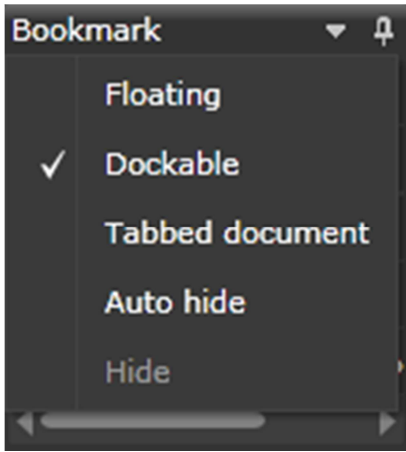

Click the component’s down arrow to open the menu.
Select the “Auto hide” option.

The component will be docked at the side of the window and will automatically hide. You can reveal it by placing your mouse over its name.

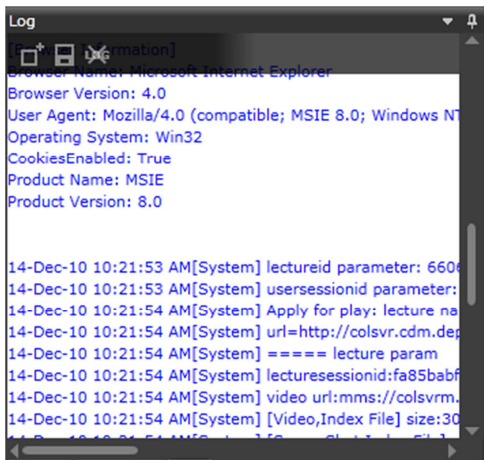

Component Window Modes

Each of the component windows in the COL Silverlight player (such as the Video, Whiteboard, and PC screen windows) has multiple display modes. These modes can be accessed by right-clicking the title bar of any of the component windows.

	<p>Floating</p> <p>The component floats on top of other windows and can be dragged around within the larger window or screen.</p>
	<p>Dockable</p> <p>The component can be docked on a side of the larger window or screen.</p>
	<p>Tabbed document</p> <p>The component becomes part of a tabbed section. If no tabbed sections exist, a new one will be created.</p>
	<p>Auto hide</p> <p>Hides the component on the left side of the larger window or screen; components can be accessed by mousing over their titles.</p>

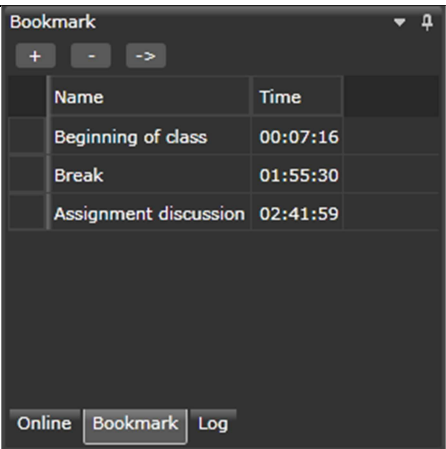

Log Window

The log can provide helpful diagnostic information to resolve technical issues with the COL Silverlight player. If you request technical support, you may be asked to provide the log file (using the Save Log button) to help diagnose your issue. If you do not see the log component in the player, click the  Settings menu and choose “Show Log Window.”

	 <p>Clear Log – clears the log window.</p>
	 <p>Save Log – save the log to a file on your computer.</p>
	 <p>Write Trace Log – turns logging on or off.</p>

Bookmarks

You may save bookmarks at any point in a lecture so that you can quickly return to them to help you study. Bookmarks can be added, removed, and edited through the Bookmark component in the COL Silverlight player.

	<div data-bbox="1133 296 1214 344" data-label="Image"> </div> <p>The plus button adds a new bookmark at the current playback location.</p> <div data-bbox="1133 443 1214 491" data-label="Image"> </div> <p>Clicking on a bookmark and then clicking the minus button will delete that bookmark.</p> <div data-bbox="1133 590 1214 638" data-label="Image"> </div> <p>Clicking on a bookmark and then clicking the arrow button will go to that bookmark.</p>
	<p>As you make bookmarks, they will be displayed as gray circles on the playback bar at the bottom of the window.</p>
	<p>To edit a bookmark, double-click on its name.</p> <p> The edit symbol will be displayed while you are editing.</p>

Online Course/Lecture List

	<p>A list of all lecture recordings that you have access to can be found in the “Online” component of the COL Silverlight player.</p> <p>Choosing a course will display all currently available lecture recordings for that course.</p> <div data-bbox="841 1423 878 1465" data-label="Image"> </div> <p>The course that is currently playing (if any) will have the play icon displayed next to its date and time.</p> <div data-bbox="1133 1598 1214 1646" data-label="Image"> </div> <p>Download selected lectures – downloads all selected (checked) lectures onto your local machine.</p>
---	---

Local (Downloaded) Course/Lecture List

A list of all downloaded lecture recordings that you have access to can be found in the “Local” component of the COL Silverlight player.

Choosing a course will display all currently available lecture recordings for that course.

 The course that is currently playing (if any) will have the play icon displayed next to its date and time.

Pause download lectures – pauses the downloading of any currently downloading lecture.

Delete selected lectures – deletes the selected lecture(s) from the local machine.

Re-authenticate lectures – re-authenticates your access to the lecture (Only works when you have network connection).

Show lecture information – provides download lecture’s information include: course number & section, day of lecture, and location of lecture on local machine.

Lecture Playback Controls

1	Play/pause button
2	Bookmark indicators <i>Automatically placed when you create a bookmark in the lecture recording</i>
3	Playback indicator
4	Elapsed time
5	Total time
6	Options menu <i>Contains options for installing desktop application, resetting to default window layout, etc.</i>
7	Mute/unmute button
8	Volume slider
9	Full-screen button <i>Press to switch between full-screen and windowed mode</i>

Getting Support for the COL Silverlight Player

You can get support for the COL Silverlight player directly from within the player. Simply select the “Report Error On Course OnLine Support” link in the  Settings menu. This will launch a new browser window with a simple form that can be filled out in order to obtain support. You may be asked to provide the log file to help diagnose your issue; please see the “Log Window” section of this document for assistance.
